Release Plan: SlugTrail

Team SlugTrail, Release 1, May 26, 2017, Revision 4

Haley Emerson
Lisa Durand
Miriam del Cerro
Eric Su
Zhihao Hong

High level goals: To create a website that gives in-depth directions with images and arrows to help students navigate their way through departments and colleges.

o **Sprint 1**

(3 story points) As a developer, I want to download the proper software so that I can continue making my web app.

(13 story points) As a developer, I want to create a college/department page so that students have options of areas on campus to find.

(8 story points) As a developer, I want to plan routes for Kresge college and take pictures of the campus so that students can have a visual for the directions.

o **Sprint 2**

(13 story points) As a developer, I want to create a classroom page for each college/department so that students can specify where they are going.

(8 story points) As a developer, I want to plan routes for Oakes college and take pictures of the campus so that students can have a visual for the directions.

(8 story points) As a developer, I want to create directions and upload pictures so that students can find their classrooms.

o **Sprint 3**

(13 story points) As a developer, I want to style my website so that it is more visually appealing and easy to understand.

(10 story points) As a developer, I want to take pictures of Cowell routes and upload images accompanied by descriptions so that students can find their classrooms.

(4 story points) As a user, I want to view a map of the highlighted route for each classroom I click on in Oakes, Cowell, and Kresge so that I can visually see the route.

Product backlog:

-As a developer, I want to map every college and department so students can navigate the entire campus.

-As a developer, I want to show routes to specific classrooms to provide better mapping for each college/department
